<u>Chapter III – Mishnah 21</u>

ַרַבִּי אֱלעֶזֶר בֶּן חָסְמָא אוֹמֵר, קִינִין וּפִתְחֵי נִדָּה, הֵן הֵן גּוּפֵי הֲלָכוֹת. הְקוּפוֹת וְגִימַטְרִיוֹת, פַּרְפְּרָאוֹת לַחָכְמָה.

Rabbi Eliezer ben Chisma¹ said: [The laws of] mixed bird offerings and the [laws of calculating the] beginnings of menstruation—indeed, these are essential parts of the laws, [while] astronomical [calculations] and [calculating] gematrias are the appetizers of wisdom.

דע אָפִילוּ לְמָפָרָס עָל שְׁמָנוּ נָאָה לוּ לְאוֹת אֱמֶת, שֶׁמְתָחַלָּה הָיָה תוֹכֵן גָּדוֹל וּבעַל מְסְפָּר וְתִשְׁבּוֹרֶת, אָבָל כְּנָגֶד זָה לֹא הָוָה יָדָע אָבָי הָיָה תוֹכֵן גָּדוֹל וּבעַל מְסְפָּר וְתִשְׁבּוֹרֶת, אָבָל כְּנָגֶד זָה לֹא הָוָה יָדַע אָת יִדַע אָפִילוּ לְמִפְרָס עַל שְׁמַע עַד שֶׁבָּא אַצֶל רִבִּי עֲקִיבָא וַעֲשָׂאוֹ חָכָם גָּדוֹל, וּמִשׁוּם הָכִי קָרוּ לֵיה חִסְמָא. וּבָא לְלַמֵּד דַּעַת אָת הָעָם, שָׁאַף כְּשָׁאֵינָם עוֹסְקִים בַּתּוֹרָה, יִבְחַרוּ לָהֶם לימּוּד הַחַכָּמוֹת שֶׁמַחְכִּימוֹת אֶת בַּעֲלִיהֶן, וְהוּא מֵעִיד עַל עַצְמוֹ, שֶׁלְפִי שֶׁהָיָה שָּכָלוֹ מְחוּדָד בְּחַכְמַת הַהַנְדָסָה וְהַתִּשְׁבוֹרֶת, זָכָה לִיכָּנֵס בַּחָדָרִים פְּנִימִיִים שָׁל הַתּוֹרָה, דְּכְתִיב בָּה "יָהֵב סְכָמָתָא לְחַכִּימִין".

"Wisdom is more of a stronghold to a wise man,"² and his name is pleasant to him as a sign of truth. That is, initially [Rabbi Eliezer] was a great astronomer and a master of numbers and geometry, but in contrast to this, he did not know even know how to perform the spreading out of the *Shema*,³ until he came to Rabbi Akiva and he made him a great sage, and because of this, they call him Chisma, viz, "he has grown strong."

He came to teach the people via this Mishnah that even when they are not engaged in the Torah, they should choose for themselves the study of wisdom that makes wise those who master [the subjects], and he testified about himself, that he followed this practice. Since his mind was sharpened by the wisdom of engineering and geometry, he merited to enter into the inner chambers of the Torah, as it is written, "He gives the wise their wisdom."⁴

¹ In some texts, the sage is referred to as Rabbi Eliezer <u>ben Chisma</u>, which does not mean "the son of Chisma," but may mean "a native of [the town of] Chisma." In other texts, he is referred to as Rabbi Eliezer Chisma, with "Chisma" being an adjective for "has grown strong." While the *Toldot Shimshon* presents the reading "ben Chisma," he apparently considers "Chisma" to be related to wisdom rather than a place name.

² Eccl. 7:19.

³ This refers to leading part of the daily prayers, possibly the first blessing of the reading of the Shema. Commentaries on Megillah 23b discuss this further.

Regarding what he said, "Indeed, these are essential parts of the laws," the commentators⁵ ask if the remaining laws are not essential parts of the laws? For us, the novelty wants to teach us something else indirectly, and there is compelling evidence for his first words, namely, in the explanation of the Rambam, of blessed memory, on the laws of the mingling of the mixed bird offerings,⁶ raised by the Rema MiFano⁷ in his responsa, siman 23.

The Rema MiFano writes regarding the priest who does not consult anyone [regarding how to proceed with a complication in a mixed bird offering] but on his own and by his own opinion he does [such-and-such an action], even though he's considered to have wisdom, nevertheless, if he had sought advice from a court, they would not have instructed thus. This is as the one discussed at the end of the 9th chapter of tractate Sanhedrin, entitled "And these are the ones who are burned": "[Regarding] one who steals a vessel for a libation, and one who curses with a sorcerer, and one who engages in intercourse with an Aramean woman, zealots strike him [and kill him]."⁸ I.e., by acting without consulting anyone, the priest is acting as a zealot.

Zealots do not consult a court, and if they were to consult at the time of the incident, they would not be instructed thus, but nevertheless the sages praised him. As we found concerning Pinchas, to whom Moses said, "Let him who reads the letter [of the Law] be the agent [for executing it]."⁹ The *halacha* definitely is proved by him, and he does not have [advance] permission [to act from the court], because [prior to his zealous action] he has not followed Zimri into the chamber and hasn't [yet] seen the action.¹⁰

וּמִשׁוּם הָכִי קֵא מַשְׁמָע לָן, שֶׁדִינֵי קִינִים אֲפִילּוּ אִם יַעֲשֶׂה נָגֶד הַדִּין מִסְבָרָתוֹ, נִקְרָאוּ גּוּפֵי הַלְכוֹת, וְזֶהוּ "הֵן הֵן" דְּקֵאָמַר.

Because of this, [the Tanna] wants to teach us something indirectly, that the laws of mixed bird offerings, even if done in opposition to the law in accordance with [the priest's] opinion, are called essential parts of the laws, and this is the meaning of "indeed, these," as he said.

Even in the laws of [calculating the] beginnings of menstruation, even though they were taught regarding a very remote possibility, indeed, these are essential parts of Torah. A woman needs to avoid intimacy with her husband during menstruation, and needs to check herself, based upon her regular cycle, to see if menstruation has begun. However, when a woman's cycle becomes irregular, the laws can become very complex. This is what is being discussed, according to the Bartenura, who says that a woman might even be required to immerse 95 times, according to one who holds that immersion at its proper time is a commandment.¹¹

This is as the aforementioned rabbi, the Rema MiFano, wrote there in his responsa, siman 24, that all [the calculations of] menstruation days, he would teach the very remote possibility, and similar very strange events. Rather, the sages did not refrain from teaching us essential parts of the Torah in every way that comes to mind, to provide the need for instruction in all its parts, and also to sharpen the students.

Even the wisdom of engineering and geometry sharpens the mind, and is effective to understand our holy Torah.

וְאָתֵי שֵׁפִּיר דְּלֹא נָקַט צֵירוּבִין וְכָלְאַיִם, שֶׁבָּהֶן אֵין שׁוּם חִידּוּשׁ לוֹמֵר שֶׁהֵן גּוּפֵי הַלָכוֹת, דְּמִלְתָא דְּפְשִׁיטָא הִיא, הוֹאִיל שֶׁהֵן בְּמָצִיאוּת קַרוֹב וְאֶפְשָׁרִי.

It's fine that [the Tanna] didn't take as an example the laws of Eruvin¹² and Kilayim,¹³ for there is no novelty within them to say that they are essential parts of the laws, for this is obvious, since they are in reality close and possible.

All the effort that he had expended in astronomical [calculations] and [calculating] gematrias, they are not vanities of the world, rather appetizers to arouse the hearts of man to know the greatness of the Creator. They are like the appetizers that arouse the eating of the bread, so from the knowledge of these [secular sciences], every man will be drawn to

learn wisdom, and "the beginning of wisdom is the fear of the L-rd."¹⁴ Also, they are literally from the essential part of the Torah, that astronomical [calculations] requires instituting a leap year and the like.¹⁵ But they are like appetizers, because there is no obligation upon a man to learn the importance of astronomical [calculations] and the movement of constellations, but for one who does know them, it is obligatory for him to make his wisdom known to the eyes of the nations, as it says in the 7th chapter of tractate Shabbat entitled "A significant principal": "Anyone who knows how to calculate astronomical seasons and [the movement of] constellations and does not do so, [Isaiah 5:12] says about him: 'They do not take notice of the work of the L-rd, and they do not see His handiwork.'"¹⁶

Even the gematrias are an appetizer of wisdom. For example, Num. 12:1 states that "Miriam and Aaron spoke against Moses because of the Cushite woman he had taken [into his household as his wife]: 'He took a Cushite woman [אָשָׁה כָשִׁית],' " for which Rashi explained that the word Cushite¹⁷ has the gematria of 736, the same as "a beautiful woman" [מַרְשָׁה יְפַת].¹⁸ For without this teaching of Rashi that "Cushite" is synonymous with "beautiful woman," we would be compelled to explain this, for [Moses's wife] was not a Cushite, rather she was a Midianite. A number of readings state "Cushi" even for someone who is not, for example, "A song of David, which he sang to the L-rd, concerning Cush, a Benjaminite,"¹⁹ and see in the Yalkut Shimoni.²⁰

Rather, in astronomical [calculations] and [calculating] gematrias one shouldn't waste his time, for they are an appetizer, while the Torah is the bread. It was taught in a Mishnah, "One who recited a blessing over the bread exempted the [need to recite a blessing over the] appetizers [as they are considered secondary to the bread]. [However, one who recited a blessing] over the appetizers did not exempt [the need to recite a blessing over] the bread."²¹

See in the Zohar, parashat Pinchas, page 220b (paragraph 139), "the esoteric secret of astronomical [calculations] and [calculating] gematrias is [that they are] appetizers to wisdom."
